

Mac OS X Version 10.5.2

For assistance during the configuration process please call the Computing and Communications Help Desk at 639-2049, avdesk@swgc.mun.ca

Who should use this document?

This document should be used by SWGC faculty, staff, and students who would like access to the WLAN and have Mac laptops which use the OS X V.10.5.2 operating system. It is provided AS IS due to Copyright and license agreements of the software contained within this distribution.

Requirements:

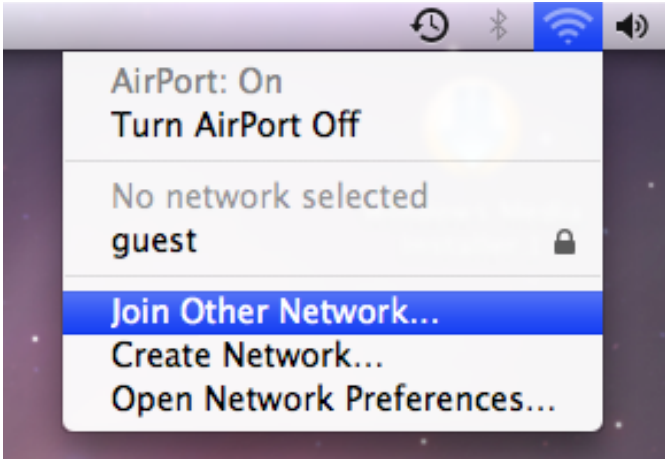

- A Mac laptop with Mac OS X Version 10.5.2
- Airport 3.4
- Airport Extreme card (802.11g)
- Your wireless account is the same as your Grenfell username (entered as swgc\- **SSID or network name:** Faculty / Staff (**fac**), Students (**stu**), Guests (**guest**)

The base install of Mac OSX version 10.5 has a known issue with its wireless settings that causes instability with our configuration. **We recommend for consistent performance and security that you have your version of Mac OS 10.5 updated to 10.5.2.**

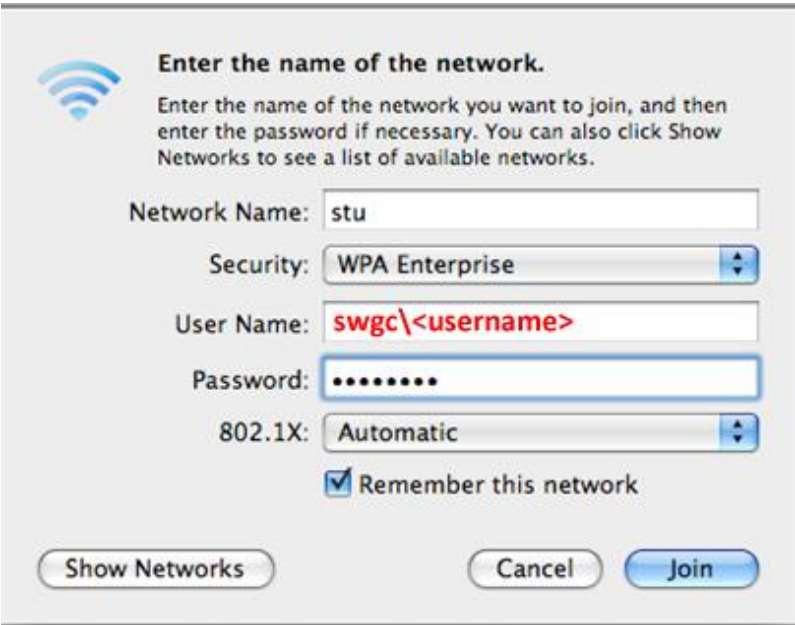

Configuration:

- 1. Click on the Airport icon and choose **Join Other Network**

- 2. Enter your **Grenfell username as swgc\<username> and password**. For Network Name (SSID): type: **stu**, **fac**, or **guest** (see [requirements](#) at the beginning of this document). Select **WPA Enterprise** for Security and **Automatic** for 802.1X.

3. You will then be prompted to verify your wireless security certificate. Choose **continue**.

4. You will then be prompted one last time to input your **wireless username and password**. Be sure to check the box to remember your password.

5. To confirm you are connected to your wireless network, click the Airport icon on the top right-hand side of your desktop.

You will notice that the wireless network you setup will have a check next to it, indicating it is the currently connected network.
